

NDBI007: Practical class 1

## Exercise 1.1 (Solution)

$$
\begin{gathered}
M T R=\frac{T C}{2 \cdot r} \\
T C=M T R \cdot 2 \cdot r \\
T C=\frac{448}{8} \cdot 0.00417 \cdot 2 \\
T C=0.46 M B
\end{gathered}
$$

* Note that transfer speed on outer edge is maximal, hence the result is the upper bound

## Exercise 1.2 (Solution)

$$
\begin{aligned}
& S D R=\frac{d a t a \_h e a d s \bullet T C}{2 \cdot r \cdot d a t a \_h e a d s+\left(d a t a \_h e a d s-1\right) \bullet h e a d \_s w i t c h \_t i m e+t r a c k \_t o \_t r a c k \_t i m e} \\
& T C=\frac{S D R \cdot\left(2 \cdot r \bullet d a t a \_h e a d s+\left(d a t a \_h e a d s-1\right) \cdot h e a d \_s w i t c h \_t i m e+t r a c k \_t o \_t r a c k \_t i m e\right)}{d a t a \_h e a d s}
\end{aligned}
$$

$$
T C=\frac{37 \cdot(2 \cdot 0.00417 \cdot 10+(10-1) \cdot 0.001+0.0012)}{10}
$$

$$
T C=0.35 M B
$$

## Exercise 1.4 (Solution)

$$
M T R=\frac{T C}{2 \cdot r}
$$

$$
\frac{1}{M T R}=\frac{2 \cdot r}{T C}
$$

$$
\begin{array}{cc}
b t t=\frac{2 \cdot r}{T C} \cdot \text { block_size } & b t t=\frac{b l o c k \_ \text {size }}{M T R} \\
b t t=\frac{2 \cdot 0.00417}{0.46} \cdot 0.004 & b t t=\frac{0.004}{0.072} \\
b t t=0.072 \mathrm{~ms} & b t t=0.072 \mathrm{~ms}
\end{array}
$$

| TC | 0.28 MB | 0.30 MB | 0.35 MB | 0.46 MB |
| :---: | :---: | :---: | :---: | :---: |
| btt | 0.119 ms | 0.111 ms | 0.095 ms | 0.072 ms |

read_time $=B C \cdot(s+r+b t t)$
read_time $=B C \cdot(s+r+b t t)$
read_time $=250,000 \cdot(8.5+4.17+0.111)$
read_time $=250,000 \cdot(8.5+4.17+0.072)$
read_time $\approx 3,195 s \approx 53 \mathrm{~m}$
read_time $\approx 3,186 s \approx 53 m$

* Note that btt is marginal compared to seek time, hence the reading and the writing is most affected by the movement of read-write head
