XML, DTD

# Basic Structural Components of XML Documents (1/2)

---

```
<?xml version="1.0" encoding="UTF-8"?>
<!-- XML declaration -->
<!-- root element -->
<root-element>

    <!-- an empty element -->
    <element/>

    <!-- attributes of an element -->
    <element attribute1="value"
            attribute2="another value">...</element>

    <!-- an element with subelements -->
    <element attribute1="value" attribute2="value">
        <subelement>TEXT CONTENT</subelement>
        <subelement>...</subelement>
    </element>
</root-element>
```

# Basic Structural Components of XML Documents (2/2)

---

```
<?xml version="1.0" encoding="UTF-8"?>
<!-- XML declaration -->

<!-- root element -->
<root-element>

    <!-- element with mixed content -->
    <element>
        TEX <subelement>MIXED</subelement> CONTENT
            WITH <subelement>SUBELEMENTS</subelement>
    </element>

</root-element>
```

---

# Common Mistakes in XML Documents

---

```
<?xml version="1.0" encoding="UTF-8"?>
<elementA>
    <!-- a bad enclosing symbol -->
    <elementB>...</elementb>

    <!-- an element without an enclosing symbol -->
    <elementD>

    <!-- a bad element nesting -->
    <elementE>
        <elementF>
            ...
        </elementF>
    </elementE>
</elementA>

<!-- another root element -->
<elementG />
```

# Basic Structural Components in DTD (1/3)

```
<!-- declaration of an element with text content -->
<!ELEMENT AAA (#PCDATA)>

<!-- declaration of an element with empty content -->
<!ELEMENT AAA EMPTY>

<!-- declaration of an element with any content -->
<!ELEMENT AAA ANY>

<!-- declaration of an element with a sequence of subelements -->
<!ELEMENT AAA (BBB,CCC?,DDD*,EEE+)>

<!-- declaration of an element with a choice of subelements -->
<!ELEMENT AAA (BBB|CCC)>

<!-- declaration of an element with a complex content model -->
<!ELEMENT AAA (BBB,((CCC,DDD*)|EEE+)+)>

<!-- declaration of an element with a mixed content -->
<!ELEMENT AAA (#PCDATA|BBB|CCC|DDD)*>
```

# Basic Structural Components in DTD (2/3)

---

```
<!-- declaration of attributes of element AAA :  
- a mandatory attribute-1 with text content  
- an optional attribute-2 with text content  
- attribute-3 with a fixed "value"  
- a key attribute-4  
- attribute-5 is a key reference  
- attribute-6 has one of the values, "value1" is default (if the  
attribute is not present in XML document, it has this value) -->  
<!ATTLIST AAA  
attribute-name-1 CDATA #REQUIRED  
attribute-name-2 CDATA #IMPLIED  
attribute-name-3 CDATA #FIXED "value"  
attribute-name-4 ID ...  
attribute-name-5 IDREF ...  
attribute-name-6 (value1|value2|...) "value1">
```

# Basic Structural Components in DTD (3/3)

---

```
<!-- internal entity declaration -->
<!ENTITY lt "&#38;#60;">
<!ENTITY c "Copyright: " >

<!-- declaration of system (private, own) external entity -->
<!ENTITY ct SYSTEM "http://ksi.mff.cuni.cz/copyright.xml" >

<!-- declaration of public external entity -->
<!ENTITY ct PUBLIC "-//W3C//TEXT copyright//EN"
"http://www.w3.org/xmlspec/copyright.xml">

<?xml version="1.0" standalone="no"?>
<copyright>&c; &ct;</copyright>
```

---

# DTD Declaration

---

```
<!-- internal declaration -->
<?xml version="1.0"?>
<!DOCTYPE root-element [...DTD...]>
<root-element>...</root-element>

<!-- private, external DTD -->
<?xml version="1.0"?>
<!DOCTYPE root-element SYSTEM "URI">
<root-element>...</root-element>

<!-- public, external DTD -->
<?xml version="1.0"?>
<!DOCTYPE root-element PUBLIC public-name>
<root-element>...</root-element>

<?xml version="1.0"?>
<!DOCTYPE root-element PUBLIC public-name "URI">
<root-element>...</root-element>
```

# Keys and References

```
<!ATTLIST product vid ID #REQUIRED>
<!ATTLIST order oid ID #REQUIRED>
<!ATTLIST item vid_ref IDREF #REQUIRED>

<sale>
  <order oid="id_1">
    <item vid_ref="id_1" />
    <item vid_ref="id_3" />
  </order>
  <order oid="id_2">
    <item vid_ref="id_2" />
    <item vid_ref="id_4" />
    <!-- the next reference leads to non existing id! -->
    <item vid_ref="id_5" />
  </order>
  <product vid="id_1" /><!-- ! "id_1" is already used -->
  <product vid="id_2" /><!-- ! "id_2" is already used -->
  <product vid="id_3" />
  <product vid="id_4" />
</sale>
```

# Common Mistakes in DTD (1/2)

---

```
<!-- Every element which we use in a DTD must be defined. The same holds for attributes. -->
```

```
<!-- usage of #PCDATA for different purpose than text or mixed content -->  
<!ELEMENT AAA (BBB, #PCDATA, CCC)>
```

```
<!-- the value of ID attribute starts with number -->  
<!ATTLIST BBB number ID #REQUIRED>  
<BBB number="1">TEXT</BBB>
```

```
<!-- EMPTY can be used only separately -->  
<!ELEMENT AAA (EMPTY | (BBB,CCC) )>
```

```
<!-- attributes can not be used in element declaration -->  
<!ELEMENT AAA (attr1 | (attr2,attr3))>  
<!ATTLIST AAA attr1 CDATA  
                 attr2 CDATA  
                 attr3 CDATA>
```

# Common Mistakes in DTD (2/2)

---

```
<!-- Only elements declared in the DTD can be used in the XML  
document (in the following example the element customer is not  
defined) -->
```

```
<!ELEMENT new-customer (...)>  
<!ELEMENT present-customer (...)>  
<customer>...</customer>
```

```
<!-- An attribute declared as choice must have a default value or  
must be compulsory -->
```

```
<!ATTLIST AAA attr1 (value1|value2|value3)>
```

```
<!-- It is not possible to specify the content of the root element  
directly in DOCTYPE. It must be done in declaration of this element  
within the DTD. -->
```

```
<!DOCTYPE AAA (BBB,CCC) [...]>
```
